Package velox.api.layer1.data

Class SimpleOrderSendParametersBuilder

java.lang.Object
    velox.api.layer1.data.AbstractSingleOrderSendParametersBuilder<AbstractSimpleOrderSendParametersBuilder<T>>
        velox.api.layer1.data.AbstractSimpleOrderSendParametersBuilder<SimpleOrderSendParametersBuilder>
            velox.api.layer1.data.SimpleOrderSendParametersBuilder

---

public class **SimpleOrderSendParametersBuilder**
extends AbstractSimpleOrderSendParametersBuilder<SimpleOrderSendParametersBuilder>

Builder for SimpleOrderSendParameters

Field Summary

Fields inherited from class velox.api.layer1.data.**AbstractSimpleOrderSendParametersBuilder**

additionalStopLossTiers, additionalTakeProfitTiers, closingPositionHint, doNotIncrease, limitPrice, reversingPositionHint, stopLossClientId, stopLossOffset, stopLossTrailingStep, stopPrice, takeProfitClientId, takeProfitOffset, trailingStep

Fields inherited from class velox.api.layer1.data.**AbstractSingleOrderSendParametersBuilder**

alias, clientId, duration, isBuy, size

Constructor Summary

Constructors

Constructor	Description
SimpleOrderSendParametersBuilder(**String** alias, boolean isBuy, int size)	
SimpleOrderSendParametersBuilder(**String** alias, boolean isBuy, int size, **OrderDuration** duration, **String** clientId, double limitPrice, double stopPrice, int takeProfitOffset, int stopLossOffset, int stopLossTrailingStep, int trailingStep, boolean doNotIncrease)	**Deprecated.**
SimpleOrderSendParametersBuilder(**String** alias, boolean isBuy, int size, **OrderDuration** duration, **String** clientId, double limitPrice, double stopPrice, int takeProfitOffset, int stopLossOffset, int stopLossTrailingStep, int trailingStep, boolean doNotIncrease, boolean reversingPositionHint, boolean closingPositionHint)	**Deprecated.**
SimpleOrderSendParametersBuilder(**String** alias, boolean isBuy, int size, **OrderDuration** duration, **String** clientId, double limitPrice, double stopPrice, int takeProfitOffset, int stopLossOffset, int stopLossTrailingStep, int trailingStep, boolean doNotIncrease, double sizeMultiplier)	**Deprecated.**

Method Summary

Methods inherited from class velox.api.layer1.data.**AbstractSimpleOrderSendParametersBuilder**

build, getAdditionalStopLossTiers, getAdditionalTakeProfitTiers, getLimitPrice, getSizeMultiplier, getStopLossClientId, getStopLossOffset, getStopLossTrailingStep, getStopPrice, getTakeProfitClientId, getTakeProfitOffset, getTrailingStep, isClosingPositionHint, isDoNotIncrease, isReversingPositionHint, setAdditionalStopLossTiers, setAdditionalTakeProfitTiers, setClosingPositionHint, setDoNotIncrease, setLimitPrice, setReversingPositionHint, setSizeMultiplier, setStopLossClientId, setStopLossOffset, setStopLossTrailingStep, setStopPrice, setTakeProfitClientId, setTakeProfitOffset, setTrailingStep, toString

Methods inherited from class velox.api.layer1.data.**AbstractSingleOrderSendParametersBuilder**

getAlias, getClientId, getDuration, getSize, isBuy, setAlias, setBuy, setClientId, setDuration, setSize

Methods inherited from class java.lang.**Object**

clone , equals , finalize , getClass , hashCode , notify , notifyAll , wait , wait , wait

Constructor Details

SimpleOrderSendParametersBuilder

```
@Deprecated
public SimpleOrderSendParametersBuilder(String   alias,
                                        boolean isBuy,
                                        int size,
                                        OrderDuration duration,
                                        String   clientId,
                                        double limitPrice,
                                        double stopPrice,
                                        int takeProfitOffset,
                                        int stopLossOffset,
                                        int stopLossTrailingStep,
                                        int trailingStep,
                                        boolean doNotIncrease,
                                        double sizeMultiplier)
```

Deprecated.

sizeMultiplier parameter was added to API due to a mistake, please use a version without it

SimpleOrderSendParametersBuilder

```
@Deprecated
public SimpleOrderSendParametersBuilder(String   alias,
                                        boolean isBuy,
                                        int size,
                                        OrderDuration duration,
                                        String   clientId,
                                        double limitPrice,
                                        double stopPrice,
                                        int takeProfitOffset,
                                        int stopLossOffset,
                                        int stopLossTrailingStep,
                                        int trailingStep,
                                        boolean doNotIncrease)
```

Deprecated.

SimpleOrderSendParametersBuilder

```
@Deprecated
public SimpleOrderSendParametersBuilder(String   alias,
                                        boolean isBuy,
                                        int size,
                                        OrderDuration duration,
                                        String   clientId,
                                        double limitPrice,
                                        double stopPrice,
                                        int takeProfitOffset,
                                        int stopLossOffset,
                                        int stopLossTrailingStep,
                                        int trailingStep,
                                        boolean doNotIncrease,
                                        boolean reversingPositionHint,
                                        boolean closingPositionHint)
```

Deprecated.

SimpleOrderSendParametersBuilder

```
public SimpleOrderSendParametersBuilder(String   alias,
                                        boolean isBuy,
                                        int size)
```
